

- Sliding Tray For Easy Fibre Access
- Accepts SC Duplex And LC Quad
- Internal Fibre Management

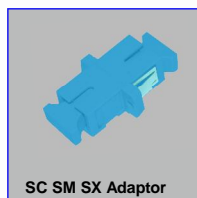

Product Description

A 19" sliding draw patch panel with 24 vertical slots for SC duplex or LC quad adaptors. The panel is supplied pre-loaded with the required adaptors with any unused slots fitted with blanking plugs, each fibre port is numbered separately to make identification easier.

The rear of the draw offers a number of cable options including 4x10mm and 2x20mm gland holes, and a removable section in the centre for specialist cables or patch cords. In addition, the base of the tray has cable securing points and cable management holes for securing Fibre Optic Management (FOM). Adjustable mounting ears allow the panel to be positioned within the rack or frame.

Features and Benefits

- Simple sliding mechanism allows the tray to be withdrawn for work on the internal fibre
- Mushroom locking mechanism holds the draw in place helping to prevent accidental tampering to the fibre
- Fibres can be spliced or polished and a splicing bridge is supplied with the FOM kit
- Panels are loaded to suit the application, with any spare slots fitted with blanking plugs
- The mounting ears can be adjusted to all various mounting positions within the rack or frame
- Multiple cable entry options and securing points in the tray to allow use of different fibre cables
- Internal mounting for the adaptors give better aesthetics and also better protection for the adaptors to prevent accidental or malicious damage

Technical Specification	
Width	19"
Height	1U
Depth	200mm
Weight	(when fully loaded) 2.8Kgs
Colour	Back matt
