

iD Active Closet Controller

The closet controller monitors and administers all processes of the connected iD Active patch panels.

Each closet controller is connected directly to the iD Server via a LAN connection, a second LAN connection is passed through the panel and can be used for connecting a Handheld PDA.

Each closet controller can manage up to 100 iD Active patch panels (if further patch panels are needed a further Closet Controller is required).

Produced in the HellermannTyton UK production facility under exacting ISO9001:2000 quality standards.

Technical Description

The 1U closet controller provides power and communications to all connected iD patch panels by the iD bus via bus management panels.

A clear backlit LCD screen gives the operator concise instructions and information during all operating modes. LED's show the status of both power and communications.

Features and Benefits

- **Backlit liquid crystal display and LED indication for user instructions and status**
- **Standard RJ45 connectivity for LAN, Handheld, Bus communications**
- **Meets all ISO/TIA Category 6 performance standards where applicable**
- **Compact 1U design as standard**
- **Automatic, real-time detection of all connections and disconnections**
- **Manageable, step by step MAC's (Moves, Adds and Changes)**
- **Enhanced security features, responsive configurable alarms and event management**
- **100% accurate, real-time visibility of assets and their utilisation**
- **Configurable User access**
- **Distributed, modular and scaleable; 100 panels (2400 ports) per Closet Controller**
- **Cost and time saving, fewer errors, manage change with no paperwork**

An IEC three pin AC power cord suitable for 110V – 240V AC is supplied for powering the panel. UK plug is fitted as standard, US and EU plugs available.

Common ground connections (4mm sockets) can be found at the rear of the panel and are used when two or more closet controllers are in close proximity to each other and field patching can occur between each set of iD patch panels.
