

HELLERMANN TYTON NEW WEBSITE LAUNCH

HellermannTyton Launches New Website To Inform Customers Of New Home Networking Product Information And Developments

HellermannTyton Data Ltd, a leader in network infrastructure and connectivity, today announced the launch of its brand new Home Network Sciences website to provide an online rich information resource for all its existing and potential customers of its Home Networking product portfolio.

The website is purely based around the Home Networking solution in providing potential users with downloadable brochures, providing more insight into the products available to them as well as giving existing users easy access to technical support as well as a substantial knowledgebase of FAQs to immediately troubleshoot any queries they may have.

The new site which sits alongside the company's main corporate website, is focused on the Home Network Sciences product suite that HellermannTyton Data Ltd offers to those who want to create a smarter digital home; by networking and distributing Satellite, video, TV, multi-zone audio, PCs and CCTV security systems from standard everyday consumer appliances, digital storage and multi-media servers. HellermannTyton Data Ltd provides the data/multimedia networking system in the form of an easy to use package, which allows new users to install and utilise the digital home experience straight away.

"We've tailored the eagerly anticipated website to appeal to the end user, installers and developers of the Home Networking solution," comments HellermannTyton Data Ltd Product Manager, Graeme Wagg. "We've endeavoured to make it as simple as possible for new and current users of the solution to be able to use the site to read up on the latest developments of the technology and how they can further advance their digital home."

The new website can be viewed by visiting:

About HellermannTyton Data Ltd

Founded in 1988 HellermannTyton Data Ltd is an established and innovative leader in developing and manufacturing global network infrastructure solutions, by offering a broad range of quality, high performance structured cabling products. Its product range includes 10G cabling, the unique pre-terminated, pre-tested 'plug & play' RapidNet system, and the Home Networking solution. Based in Northampton, the company is part of the global HellermannTyton group, which has operations in 32 countries worldwide.
